

AHMED MOHAMED

Data Scientist | Data Engineering & Analytics | Machine Learning / AI

El Maadi, Cairo, Egypt | 01067822087 | ahmed1mohamed2cs@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Science student (expected graduation 2027) specializing in Data Science, Data Engineering, Data Analysis, Machine Learning and AI. Hands-on experience across data-focused internships and freelance programs, combined with 2.5+ years in customer-facing roles that sharpened communication and problem-solving. Currently building production-oriented data science skills through DEPI and an international AI program with the University of Tokyo. Actively seeking a full-time Data Scientist role or internship.

EXPERIENCE

Data Scientist — Digital Egypt Pioneers Initiative (DEPI)

July 2026 – Present (2 months) | Cairo, Egypt

- Working on applied data science projects as part of a nationwide government-backed technology training initiative.
- Applying the end-to-end data science workflow: data cleaning, exploratory analysis, modeling and evaluation.

Machine Learning Intern — National Telecommunication Institute (NTI)

July 2026 – August 2026 (2 months) | Online

- Built and evaluated machine learning models as part of a structured, mentor-led training track.
- Practiced feature engineering, model selection and performance evaluation on real datasets.

GCI 2026 World Student — Matsuo-Iwasawa Lab, University of Tokyo

April 2026 – August 2026 (5 months) | Online

- Selected for the Global Consumer Intelligence (GCI) program, an international data science and AI training track run by a leading University of Tokyo research lab.
- Completed applied machine learning and deep learning coursework alongside a global cohort of students.

Freelancer — "How to Freelance and Develop Yourself" — Information Technology Industry Development Agency (ITIDA)

March 2026 – June 2026 (4 months) | Online

- Completed a structured ITIDA program on building a freelance career and professional self-development in tech.

Advanced Data Analyst — National Telecommunication Institute (NTI)

August 2025 – September 2025 (2 months)

- Performed exploratory data analysis and built data-driven insights using analytical tooling as part of an advanced analytics track.

Operations Support and Analyst — DeliveryX

July 2025 – Present (1 year 2 months) | Egypt

- Support day-to-day operations with data tracking and analysis to help improve process efficiency.

Customer Support Professional — DLVAGO Express

January 2023 – August 2025 (2 years 8 months) | Cairo, Egypt

- Handled customer inquiries end-to-end, resolving issues efficiently while maintaining service quality.
- Built strong communication, problem-solving and multitasking skills in a fast-paced operational environment.

EDUCATION

Bachelor's Degree, Data Science (Expected) — Faculty of Computer Science and Artificial Intelligence, Canadian International College (CIC)

Expected 2027

CERTIFICATIONS

Machine Learning • Getting Started with Deep Learning • Advanced Data Analysis • AI for All • Building LLM Applications with Prompt Engineering

SKILLS

Data & AI: Data Science, Data Engineering, Data Analysis, Machine Learning, Deep Learning, Exploratory Data Analysis (EDA), Data Intelligence, LLMs & Prompt Engineering

Technical Tools: Python, SQL, Pandas, NumPy, Scikit-learn, Excel, Data Visualization

Languages: Arabic (Native), English (Professional Working Proficiency)

Professional: Communication, Problem Solving, Customer Support, Freelancing & Self-Development
